My Sister Is Researching Medical Programs in St. K

Autor: Irene-byrd12 - 2026/09/30 13:07

_____

My sister recently decided to pursue medicine abroad and has started researching Medical Schools in St. Kitts. At first, she was mostly interested in tuition and location, but she soon realized that accreditation, clinical rotations, faculty support, licensing exam preparation, and residency opportunities also deserve attention. We've been comparing different programs, but she is still unsure about what questions to ask admissions teams. If anyone has studied or researched medical programs in St. Kitts, what helped you narrow down your options? Were there any important details you wish you had checked earlier?
