Launch a Sweepstakes Casino Software with $10M ROI

Autor: stevejohnson - 2026/09/16 09:37

Sweepstakes casino software is a ready-made or custom-built platform that lets an operator run casino-style games — slots, table games, instant win, live dealer on a promotional sweepstakes framework instead of a real-money wagering license.

Hivelance builds iGaming and sweepstakes casino platforms for operators across the U.S., Europe, the Middle East and Asia. Our practice covers dual-currency wallet architecture, AMOE module design, game aggregation, KYC/AML and geolocation integration, payment orchestration with processor redundancy, and the jurisdictional control plane that lets you switch a state off cleanly when the law changes.
