Service light on and I need it sorted before a road trip

The service light came on in my Sportage last week and I've been putting it off because my usual place is booked out for ages. I'm driving to Liwa for a family thing soon and I'd rather have it done before then rather than risk something on that long stretch. I'm near MBZ City so I've been looking for Fast Kia service in MBZ City, but quick shouldn't mean rushed. Has anyone found somewhere in the area that can turn a service around without a huge wait and still does a proper job? Also, what should a standard service actually include on a Sportage, because I want to know what I'm paying for and not just get an oil change and a stamp.

==========
