_____

Anyone near MBZ City know a Jeep mechanic who doesn't guess?

I've been through three garages with my Wrangler and none of them seem to actually know the vehicle, they just replace things until the noise stops. The last one changed a part that had nothing to do with the problem and charged me for the privilege. I'm near MBZ City so I've been looking into Helpful Jeep mechanics serving MBZ City drivers, but I'd rather hear from actual owners than trust a listing. Has anyone found someone who diagnoses properly rather than guessing? Specifically I need someone good with the suspension and steering, since that's where mine keeps needing attention. Also, do you find these specialists are honest about what doesn't need doing, or do they upsell like everyone else?
